

"I would highly recommend ClicData to anyone who would like a cost effective, robust BI Dashboard solution. Several trials with other solutions were all good, but ultimately they would have cost thousands annually. With ClicData we have all the functionality we need for an affordable price."

Rick
Vice President of Ancillary Services of NaphCare

Keeping staff updated on workload, live

We track everything from actual costs vs budgets, human resource data, drug utilization statistics, and my work volume here in the pharmacy where ClicData is used as a display solution throughout the pharmacy where our employees can visualize work that is pending in our software system as well as work completed. This alone has streamlined our pharmacy operations increasing our output by eliminating the need for our staff to have to constantly log into their desktops to see if there is any pending tasks to be completed.

About NaphCare

NaphCare is a National HealthCare Company which provides cost effective, quality healthcare services to correctional institutions across the country. Our expertise ranges from Utilization Management, Pharmacy and Dialysis Services to Electronic Health Record.
