

"I've been continually impressed at the depth of features available in the ClicData platform. It rivals the capabilities of the leading enterprise offerings. Their support team is also highly responsive and a pleasure to work with!"

**Max Silverman**  
Director of Operations

## Tracking business progress at all times

---

As a new and growing company, we were in desperate need of a business intelligence platform that allowed us to integrate data from across our disparate systems (web, proprietary, etc) and visualize that data for a diverse set of stakeholders, without shelling out hundreds or thousands of dollars each month for the privilege. ClicData has given us an extremely robust, flexible and intuitive platform for surfacing highly actionable data to both our internal team and our external community.

## About Seed&Spark

---

**Seed&Spark** is emerging as the audience-building platform of choice among independent filmmakers. Integrating crowdfunding with multi-platform distribution, Seed&Spark is empowering filmmakers to build sustainable careers through access to both tools and data.
