

"I would recommend ClicData to everyone. It's a valuable tool for making sense of data with ease. You've helped streamline our client services and freed up extra time for our account managers."

Nicolette  
Co-founder of Visio Media

## Comparing advertising locations and times

---

We calculate audience engagement using state of the art technology like anonymous facial detection and near field communication; with many different technologies constantly at play, we have tons of raw data coming in every minute. We had been looking for a while to find software capable of understanding all our data sources that is easy to use but still aesthetically appealing. ClicData is absolutely perfect for our needs. Now our clients can easily filter through and compare different advertising locations and time periods.

## About Visio Media

---

Visio Media enables its customers to target affluent and active customers that are hard to reach. Their specialty is providing captive ad space in luxury residential and commercial high rises, to anyone from local business, national retailers and media buyers.
